OBJECTIVE

1. OBJECTIVE

The objective of Task 02 was to build a fully responsive multi-section business website using HTML5, CSS3 and Vanilla JavaScript — without using any CSS frameworks or JavaScript libraries.

The goal was to:

• Design and develop a professional business website

• Implement at least 6 interactive JavaScript features

• Build a modern, clean UI/UX system

• Ensure the website works perfectly on desktop, tablet and mobile devices

• Apply a consistent color scheme and typography

• Organize the folder structure professionally

• Deploy the website using GitHub Pages

This task demonstrates practical application of core web development skills including semantic HTML5, modern CSS3

techniques, DOM manipulation, and event-driven interactivity using pure JavaScript.

TECHNOLOGIES USED

2. TECHNOLOGIES USED

Technology	Purpose
HTML5	Semantic page structure
CSS3	Styling, Flexbox, Grid
JavaScript (ES6+)	Interactivity and DOM
CSS Custom Properties	Light & dark theme system
CSS Flexbox	Layout alignment
CSS Grid	Section layouts
requestAnimationFrame	Counter animation smoothing
Intersection/Scroll API	Trigger events on scroll
Google Fonts	Typography

FRAMEWORKS NOT USED:

✗ No Bootstrap

✗ No Tailwind CSS

✗ No jQuery

✗ No React / Vue / Angular

✗ No downloaded templates

All code was written from scratch.

WEBSITE STRUCTURE

3. WEBSITE STRUCTURE

Single-page business website with smooth-scroll navigation

between 7 major sections:

1. HOME / HERO

- Welcome heading
- Short tagline
- Call-to-action buttons
- Hero image

2. COUNTERS (STATS)

- 3 animated stat cards
- Numbers count up on scroll

3. ABOUT

- Company introduction
- About image
- "Work With Us" CTA

4. SERVICES

- 3 service cards
- Web Design, Web Development, Digital Solutions

5. PORTFOLIO

- 3 project cards
- Images, titles, descriptions and tech tags

6. IMAGE SLIDER

- 3-slide carousel
- Previous / Next buttons
- Clickable dot indicators

7. FAQ

- Accordion with 3 questions
- One open at a time

8. CONTACT

- Contact form (Name, Email, Message)
- Real-time validation

9. FOOTER

- Copyright with auto-updating year
- Back to home link

FOLDER STRUCTURE:

business-website

├── index.html

├── style.css

└── script.js

DESIGN APPROACH

4. DESIGN APPROACH

COLOR PALETTE (Dark Theme - Default):

- Background: #0f0d14 (Deep Dark Purple)
- Surface: #191520
- Surface Alt: #14111b
- Text: #f5f2fa (Off White)

- Muted Text: #c1b9ce
- Accent Purple: #a855f7
- Purple Dark: #7928ca
- Border: #33263f

COLOR PALETTE (Light Theme):

- Background: #faf7ff
- Surface: #ffffff
- Text: #241b2f
- Accent Purple: #7928ca

TYPOGRAPHY:

- Font Family: Arial, Helvetica, sans-serif
- Line height: 1.7
- Headings: clamp () for responsive sizing
- Subtitle tags: Purple, uppercase, letter-spaced

LAYOUT SYSTEM:

- CSS Grid for section layouts
- Flexbox for navbar, cards, alignment
- Consistent section padding: 85px 8%
- Scroll-padding for smooth navigation

DESIGN ELEMENTS:

- Sticky navigation bar
- Rounded corners (6-14px)
- Border highlights on hover
- Soft shadows
- Purple accent throughout
- Dark theme default, light theme toggle

ACCESSIBILITY:

- Semantic HTML5 elements
- ARIA labels on interactive buttons

• Focus states on links and inputs

• Sufficient color contrast

• Keyboard-friendly navigation

JAVASCRIPT FEATURES

5. INTERACTIVE JAVASCRIPT FEATURES

The task required at least 6 interactive features.

8 features were implemented:

1. RESPONSIVE NAVIGATION MENU

- Hamburger icon on mobile (768px and below)
- Click to open/close navigation
- Icon toggles between ☰ and ✕
- Menu auto-closes when a link is clicked
- Smooth animation

2. IMAGE SLIDER

- 3-slide carousel of workspace images
- Previous / Next navigation buttons

- Clickable dot indicators
- Active dot highlights current slide
- Loops infinitely in both directions

3. FAQ ACCORDION

- Click question to expand answer
- Only one FAQ open at a time
- Plus (+) icon rotates too minus (−)
- ARIA attributes updated dynamically
- Smooth interaction without reloads

4. **CONTACT FORM VALIDATION**

- Prevents submission until fields are valid
- Checks for empty Name, Email, Message
- Email validated with regex pattern
- Error messages displayed below each field
- Success message on valid submission
- Form resets after successful validation

5. SCROLL-TO-TOP BUTTON

- Appears after scrolling 300px
- Fixed bottom-right position
- Smooth scroll to top on clicks
- Fades in/out based on scroll position

6. DARK / LIGHT MODE TOGGLE

- Button in the navigation bar
- Toggles between 🌞 and 🌙 icons
- Uses CSS custom properties to switch all colors
- Smooth color transition (0.3s)
- Instant theme switch

7. ANIMATED COUNTERS (Bonus)

- Numbers count up from 0 to target value
- Triggered when stats section enters viewport
- Uses requestAnimationFrame for smooth animation
- Runs only once per page load

- Duration: 1500ms per counter

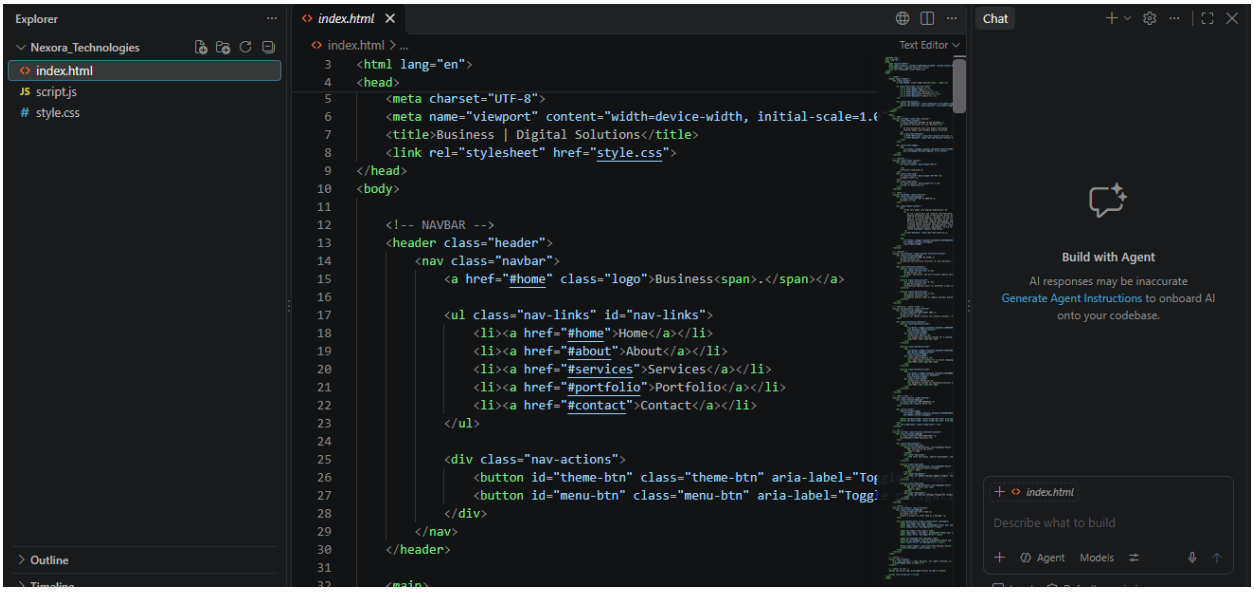

8. AUTO-UPDATING FOOTER YEAR (Bonus)

- Copyright year updates automatically
- Uses JavaScript Date object
- Always displays current year

CODE SCREENSHOTS

6. CODE SCREENSHOTS

toggle and hamburger menu button.

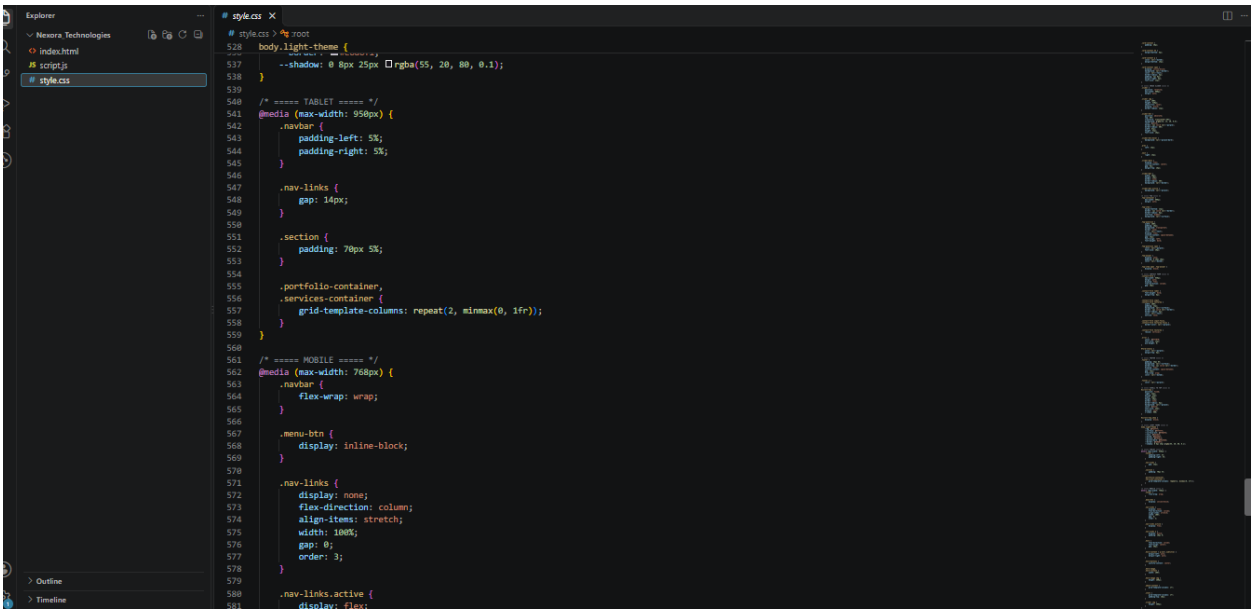

6.2 HTML — Hero and Portfolio Sections

Caption: Hero section with CTA buttons and portfolio

cards with tech tags.

6.3 CSS — Responsive Media Queries

```
Explorer
Nexora Technologies
index.html
script.js
style.css
style.css
style.css > :root
body.light-theme {
    --shadow: 0 8px 25px rgba(55, 20, 80, 0.1);
}

/* ===== TABLET ===== */
@media (max-width: 950px) {
    .navbar {
        padding-left: 5%;
        padding-right: 5%;
    }

    .nav-links {
        gap: 14px;
    }

    .section {
        padding: 70px 5%;
    }

    .portfolio-container,
    .services-container {
        grid-template-columns: repeat(2, minmax(0, 1fr));
    }
}

/* ===== MOBILE ===== */
@media (max-width: 768px) {
    .navbar {
        flex-wrap: wrap;
    }

    .menu-btn {
        display: inline-block;
    }

    .nav-links {
        display: none;
        flex-direction: column;
        align-items: stretch;
        width: 100%;
        gap: 0;
        order: 3;
    }

    .nav-links.active {
        display: flex;

and hamburger menu.

6.4 JavaScript — Navigation Menu

```
Explorer
Nexora Technologies
index.html
script.js
style.css
script.js
script.js
// 1. RESPONSIVE NAVIGATION MENU
const menuBtn = document.getElementById("menu-btn");
const navLinks = document.getElementById("nav-links");

menuBtn.addEventListener("click", function () {
    navLinks.classList.toggle("active");

    menuBtn.textContent =
        navLinks.classList.contains("active") ? "✕" : "☰";
});

document.querySelectorAll(".nav-links a").forEach(function (link) {
    link.addEventListener("click", function () {
        navLinks.classList.remove("active");
        menuBtn.textContent = "☰";
    });
});

// 2. IMAGE SLIDER
const sliderImage = document.getElementById("slider-image");
const nextBtn = document.getElementById("next-slide");
const prevBtn = document.getElementById("prev-slide");
const dotsContainer = document.getElementById("slider-dots");

const images = [
    "https://images.unsplash.com/photo-1497366754035-f200968a6e72?auto=format&fit=crop&w=1200&q=80",
    "https://images.unsplash.com/photo-1497366811353-6870744d04b2?auto=format&fit=crop&w=1200&q=80",
    "https://images.unsplash.com/photo-1497366216548-37526070297c?auto=format&fit=crop&w=1200&q=80"
];

let currentSlide = 0;

images.forEach(function (image, index) {
    const dot = document.createElement("button");
    dot.classList.add("slider-dot");
    dot.setAttribute("aria-label", "Show image " + (index + 1));

    dot.addEventListener("click", function () {
        currentSlide = index;
        showSlide();
    });

    dotsContainer.appendChild(dot);
});

icon change.

6.5 JavaScript — Image Slider

```
});

// 5. SCROLL-TO-TOP BUTTON
const scrollTopBtn = document.getElementById("scroll-top");

window.addEventListener("scroll", function () {
    scrollTopBtn.classList.toggle("show", window.scrollY > 300);
});

scrollTopBtn.addEventListener("click", function () {
    window.scrollTo({
        top: 0,
        behavior: "smooth"
    });
});

// 6. DARK / LIGHT MODE
const themeBtn = document.getElementById("theme-btn");

themeBtn.addEventListener("click", function () {
    document.body.classList.toggle("light-theme");

    themeBtn.textContent =
        document.body.classList.contains("light-theme") ? "" : "";
});
```

loop logic.

DESKTOP SCREENSHOTS

7. DESKTOP SCREENSHOTS

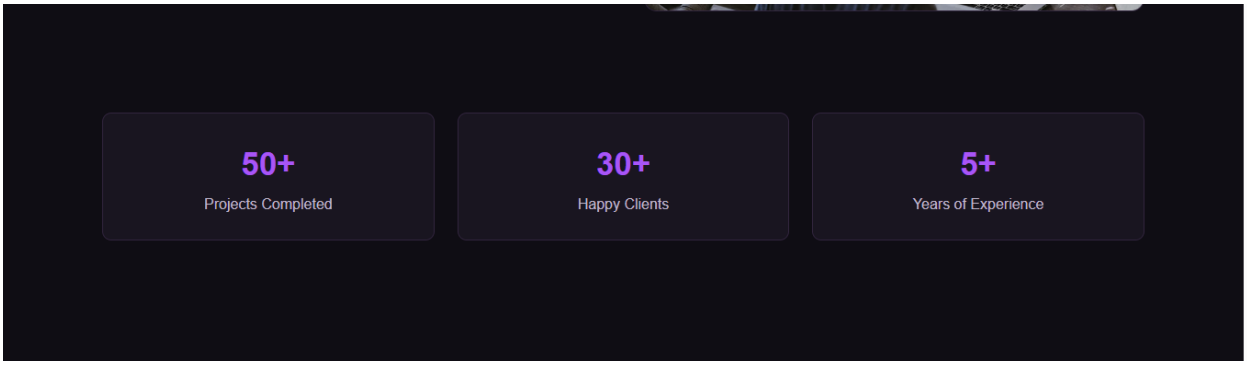

7.1 Home Page — Hero Section

Caption: Hero section with welcome heading, CTA

buttons and hero image on desktop.

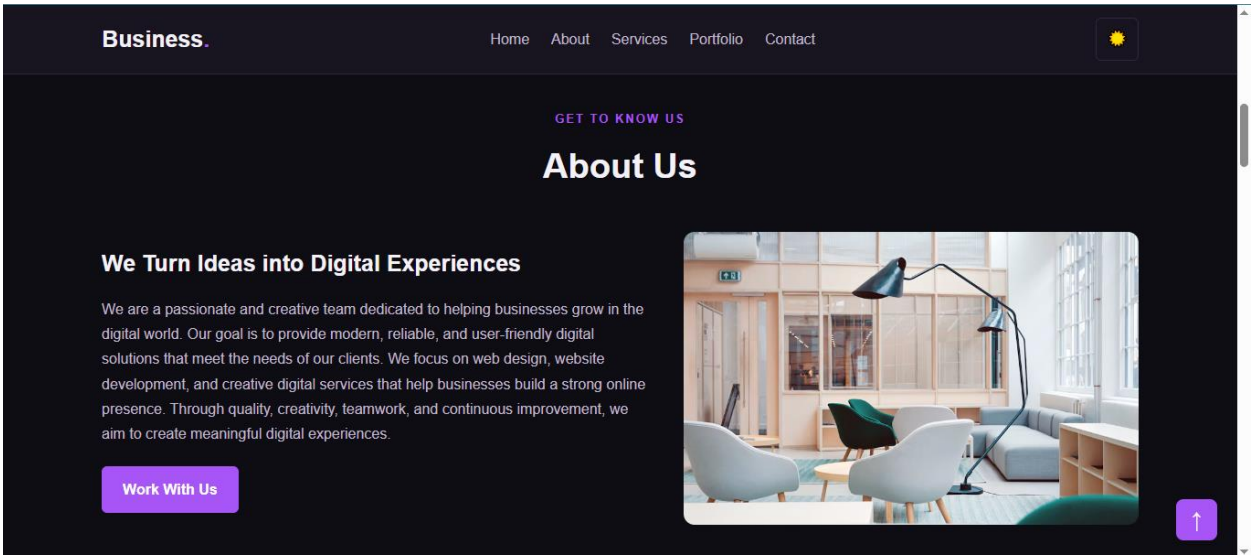

7.2 Counters Section

Caption: Three animated stat cards showing projects,

clients and years of experience.

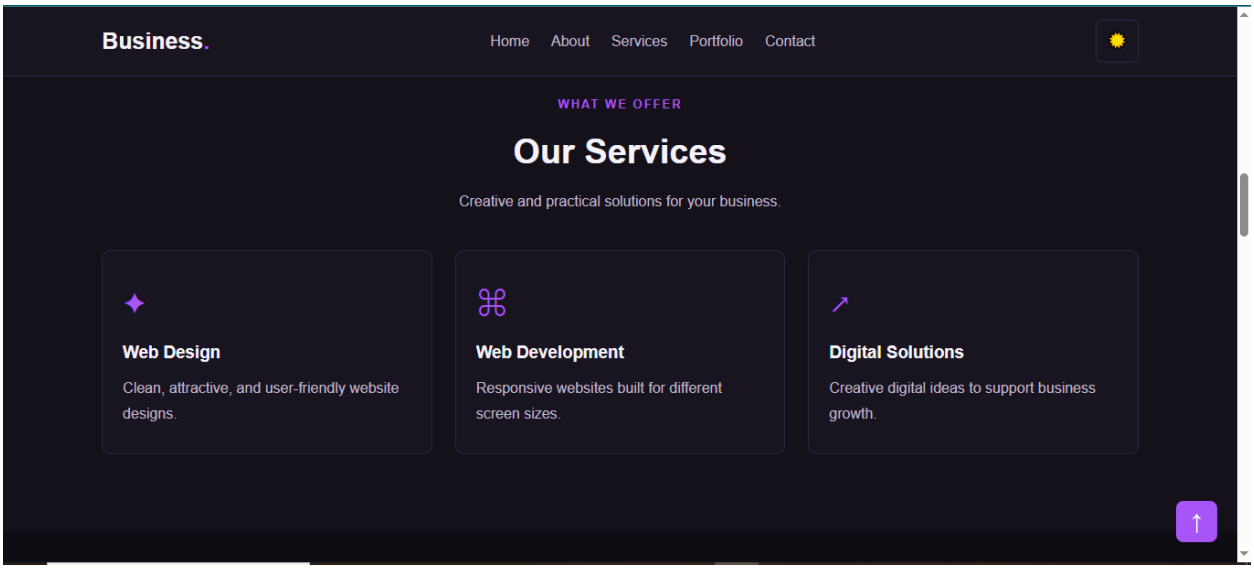

7.3 About Section

Caption: About Us section with heading, description

and workspace image.

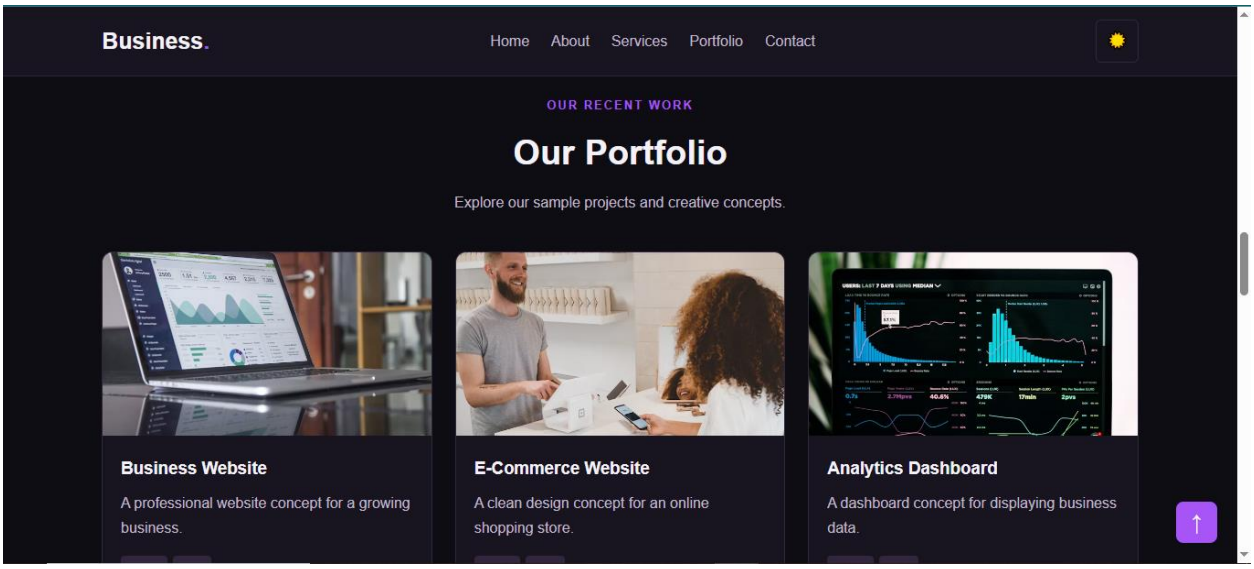

7.4 Services Section

Caption: Three service cards with icons and hover

lift effect.

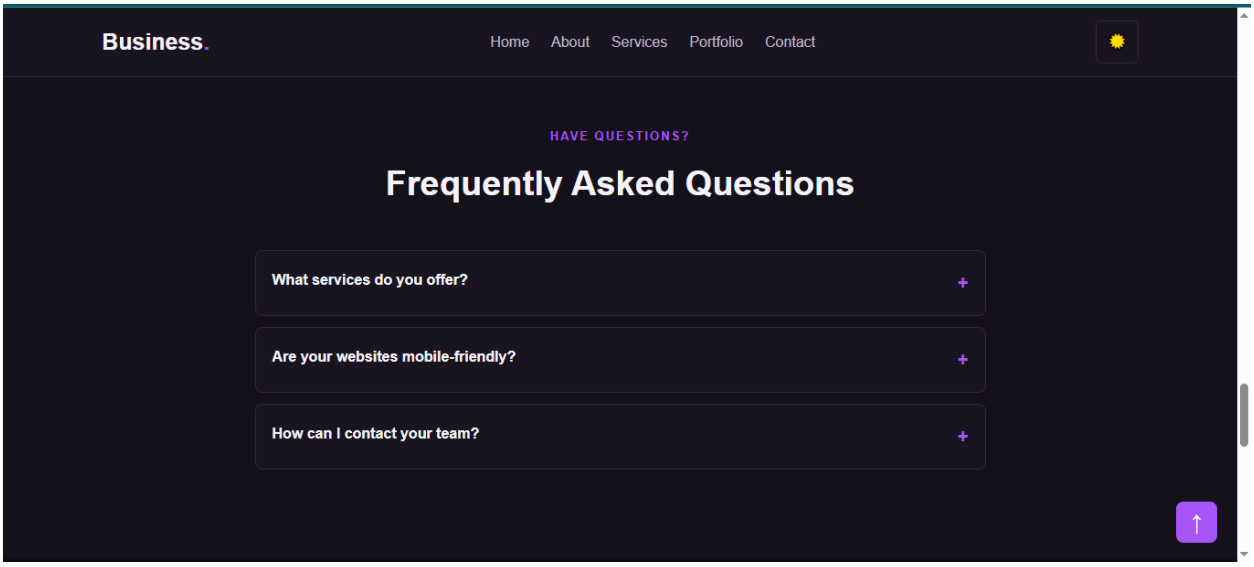

7.5 Portfolio Section

Caption: Portfolio grid showing project cards with

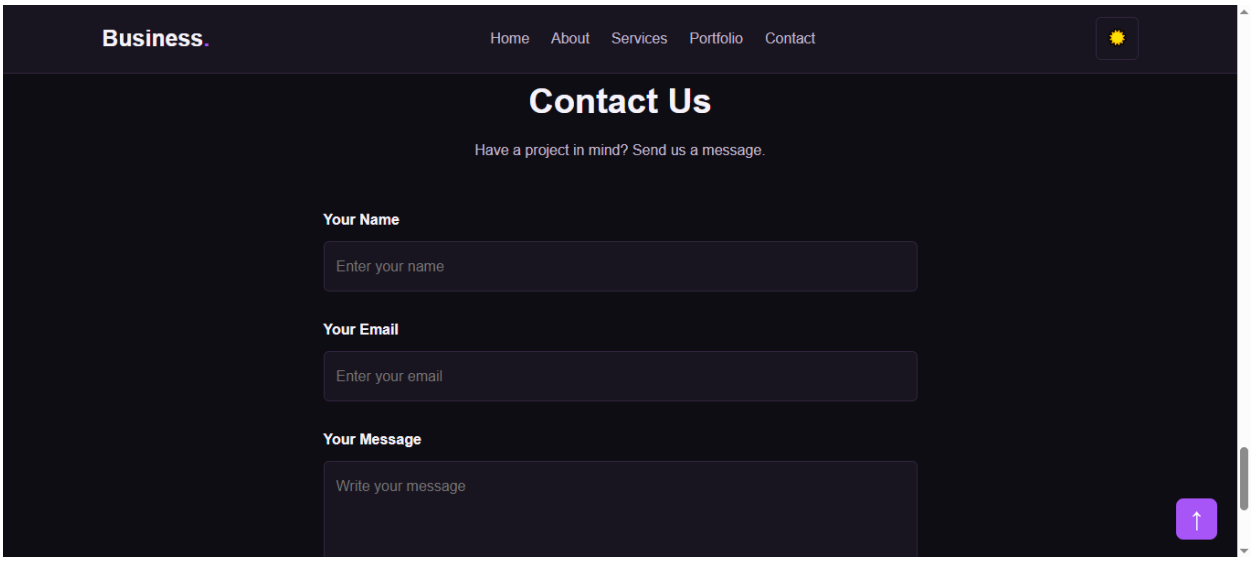

images, descriptions and tech tags.

7.7 FAQ Section

Caption: FAQ accordion with expandable questions.

7.8 Contact Form

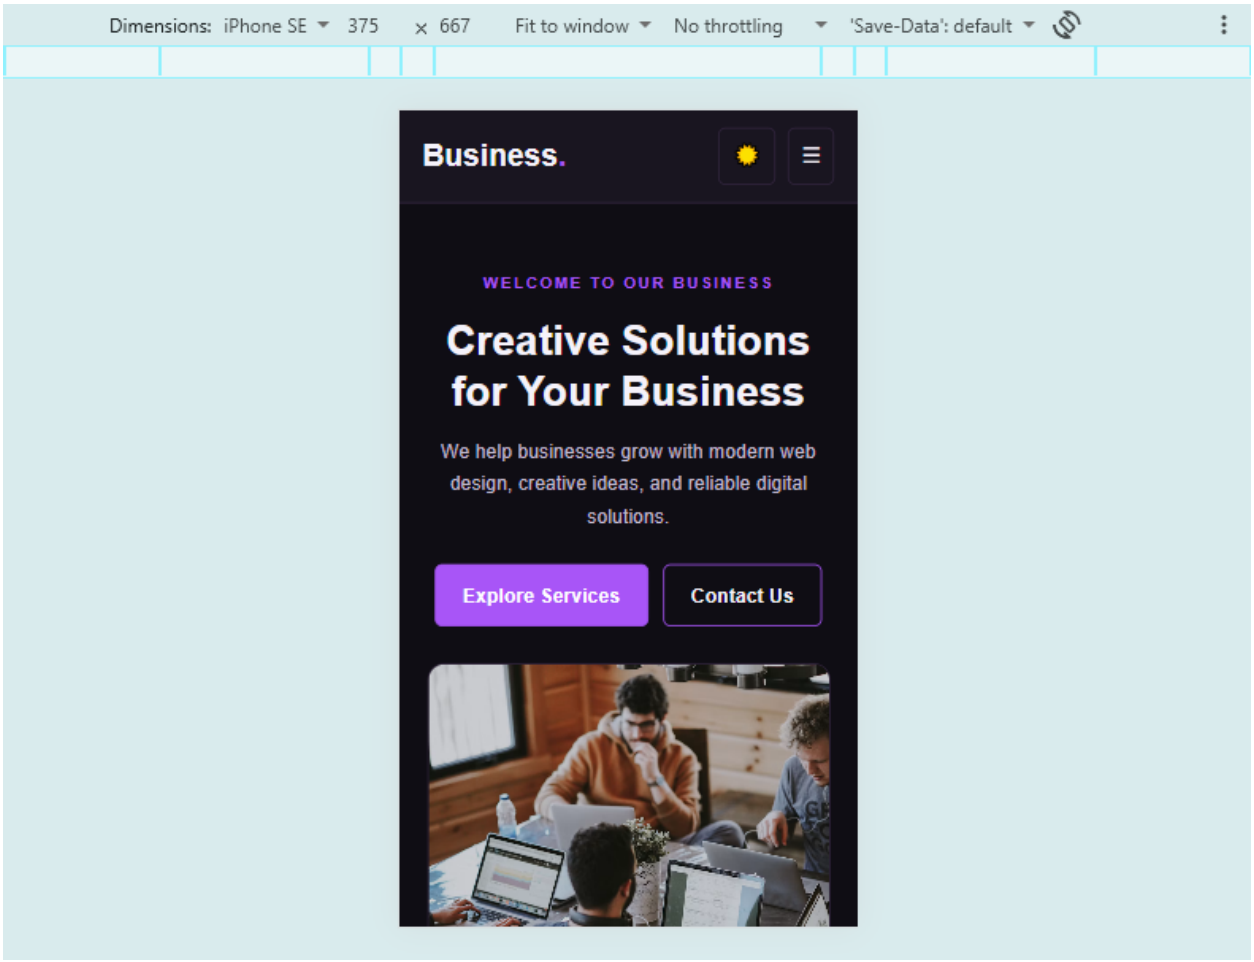

Caption: Contact form with name, email and message

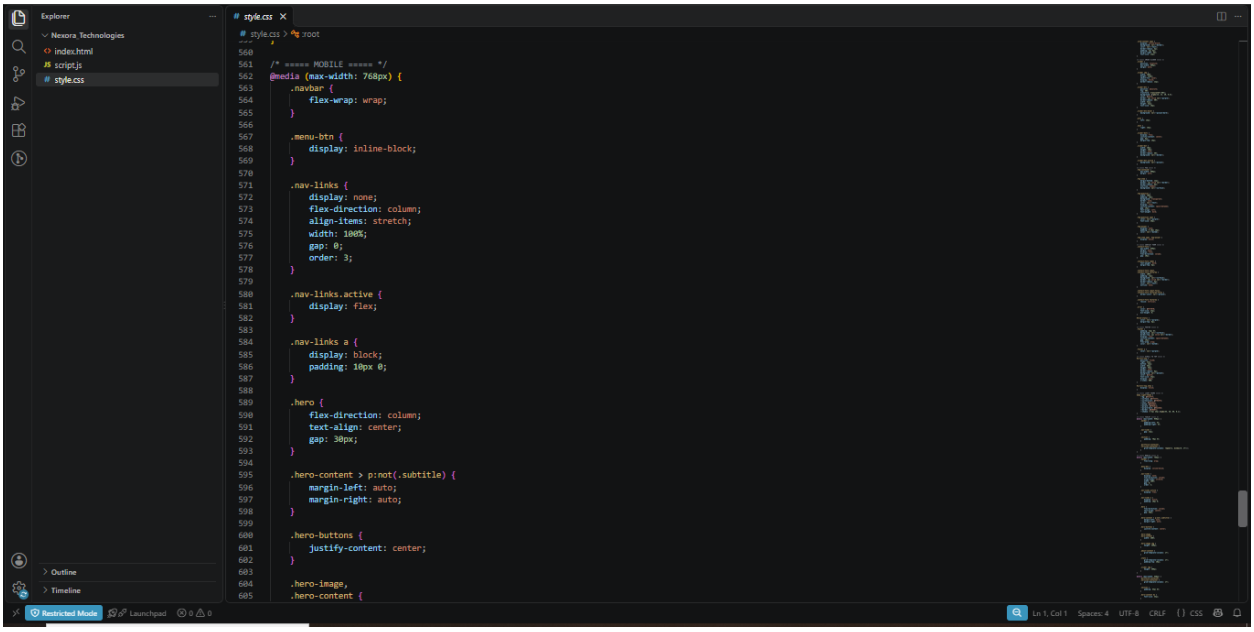

fields and validation.

MOBILE SCREENSHOTS

8. MOBILE SCREENSHOTS

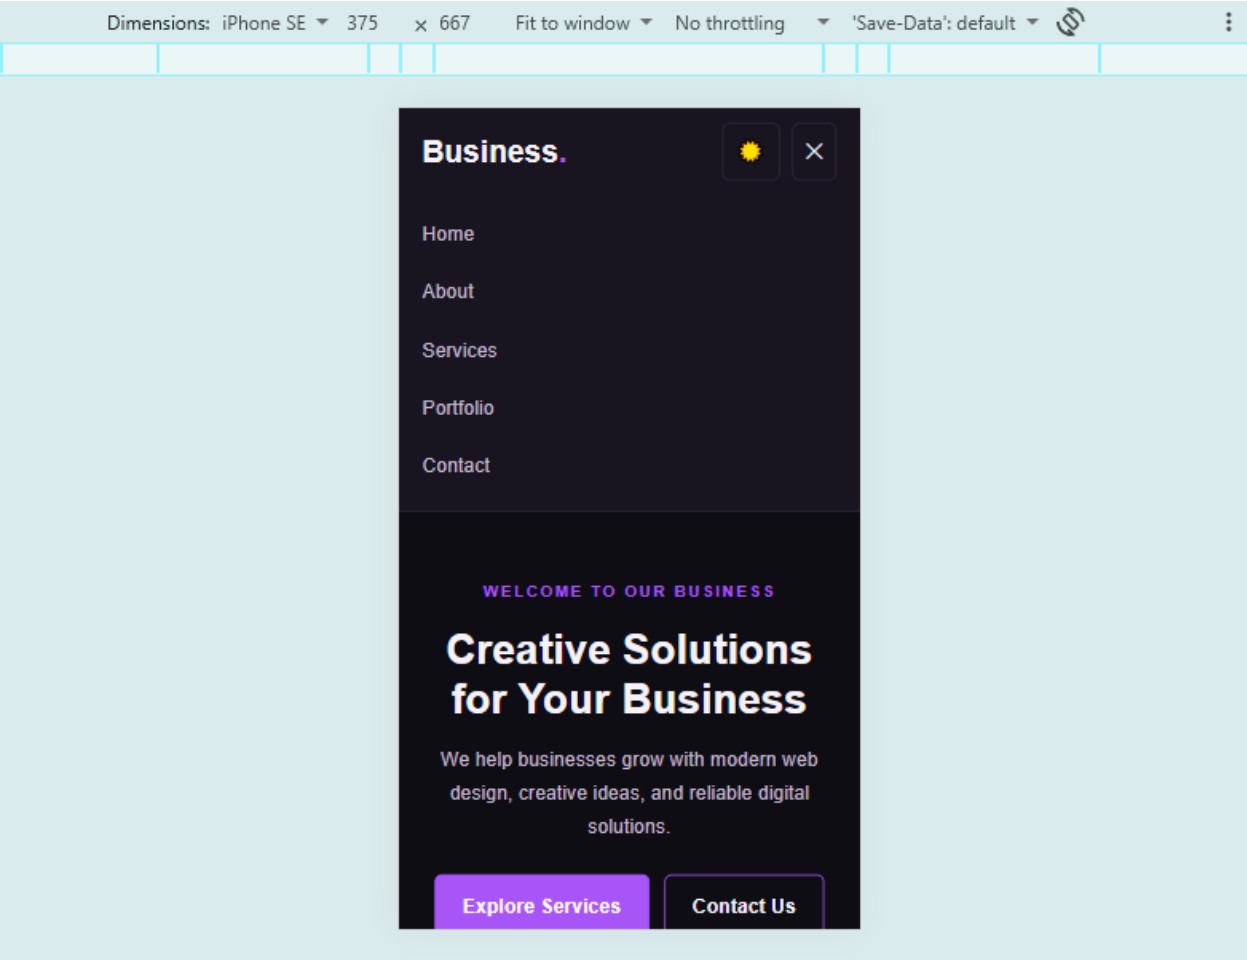

8.1 Mobile Hero

Caption: Responsive hero section on mobile with

centered layout.

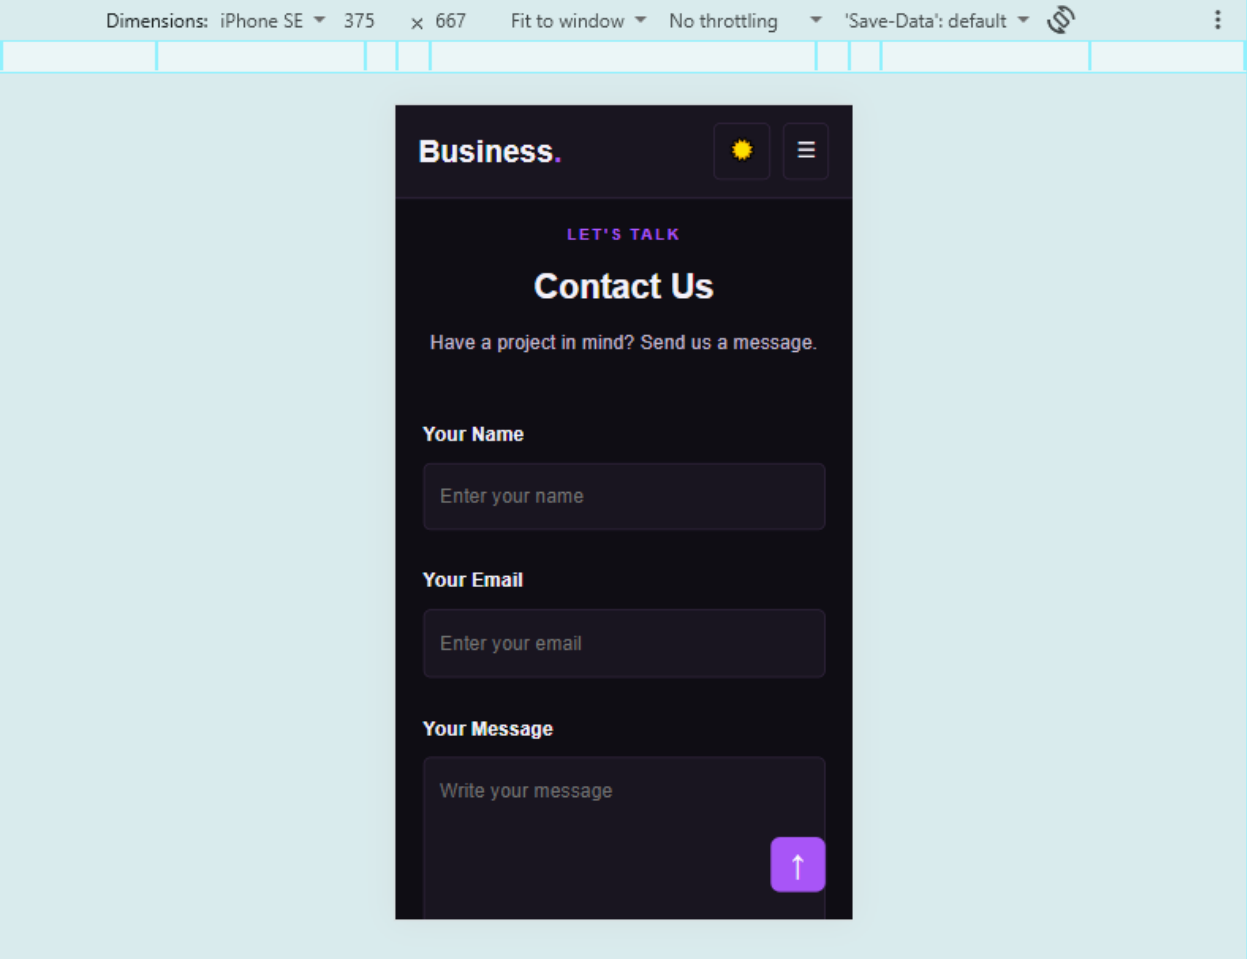

8.2 Mobile Navigation Menu Open

Caption: Hamburger navigation menu expanded on

mobile with close icon.

8.4 Mobile Contact Form

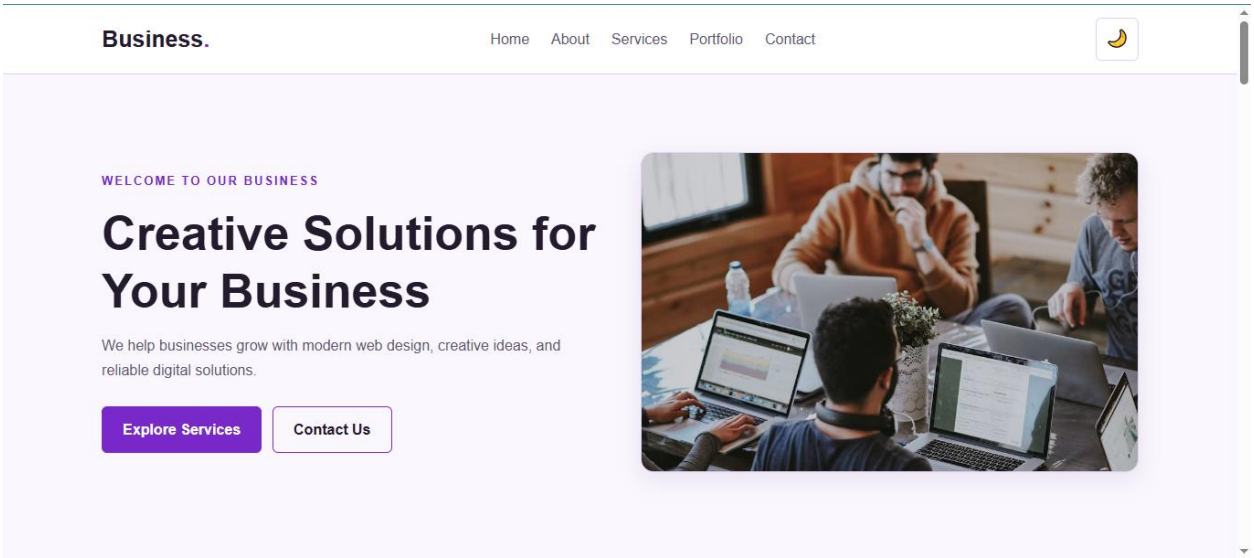

Caption: Contact form with stacked fields on mobile.

LIGHT THEME SCREENSHOTS

9. LIGHT THEME SCREENSHOTS

9.1 Light Theme — Home

Caption: Home page with the light theme applied

via the toggle button.

CONCLUSION

10. CONCLUSION

This task successfully demonstrated the ability to build

a complete business website using only HTML5, CSS3 and

Vanilla JavaScript.

Key achievements:

- Built a fully responsive multi-section business website
- Implemented 8 interactive JavaScript features

  (task requirement was only 6)

- Designed a modern UI with light and dark themes
- Applied semantic HTML5 and modern CSS3 techniques (Flexbox, Grid, Custom Properties)
- Wrote clean, organized, maintainable code
- Deployed the website using GitHub Pages (bonus)

The final website works seamlessly across desktop, tablet and mobile devices. It meets and exceeds all requirements outlined in Task 02.

Key learnings:

- DOM manipulation with vanilla JavaScript
- Event-driven interactivity (click, scroll, submit)
- requestAnimationFrame for smooth animations
- Regex-based email validation
- Building design systems using CSS variables
- Scroll-based UI behaviours

• Git & GitHub workflow for version control

• Deploying static websites with GitHub Pages
